

FLOWING SCREED

BRETT CONCRETE

Flowing screed is easy to install and provides great labour and time savings on many projects

Established over many years and with a proven track record, our **flowing screed** is ideal for use in non-wearing applications where an additional floor covering is to be applied.

Flowing screed benefits:

- Pumpable over long distances both horizontally (150m) and vertically (60m)
- Self-levelling
- Self compacting
- Reduces manual handling on site
- No curing required
- Can be walked on after 24-48hrs
- Can be force dried after 7 days to allow faster placement of floor coverings
- Perfect for encapsulating electric or warm water under floor heating systems
- Manufactured to exacting standards to meet the requirements of BS EN 13813:2002 and ISO 9001

Brett Concrete has many years of experience in the production and supply of screed products to the construction industry across the South East region.

All of our products are supplied from QSRMC approved concrete plants.
